

# HEPA FILTRATION SYSTEMS

Hepa filter unit is made from galvanized steel sheets. Standart Color RAL 9010 according to LST 1495, LST EN10346:2009, ISO 12944-5:2007 requirements.

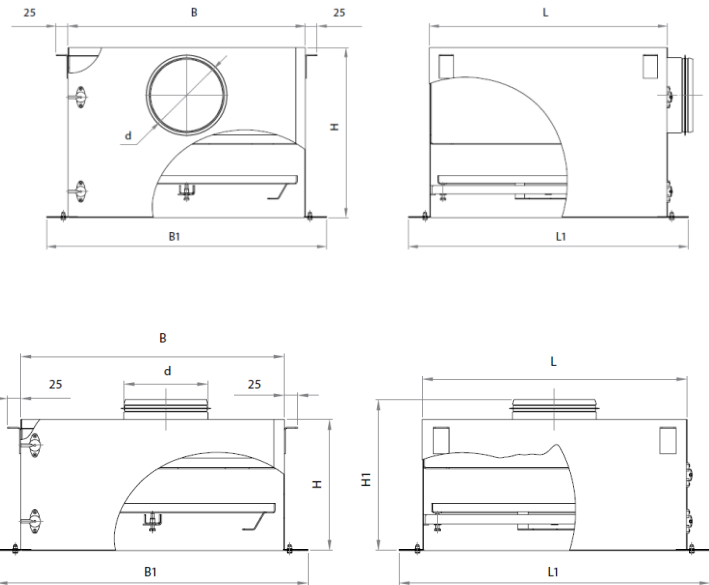

### Design features:

- Smooth painted surfaces and stainless elements prevents from accumulation of dirt and pathogens;
- In the box is stainless steel elements, because of that i can be cleaned with disinfectants,
- Inner construction elements do not have sharp angles, therefore cleaning fabric do not tear and prevents from injuries.
- Smooth filter surface can ensure the pressure tightness of the filter,
- In the construction is using sealing silicone according ISO846 standard.

### Advantages:

- Wide range of ceiling diffusers,
- A large variety of sizes,
- Integrated filter pollution measuring thimble,
- Simple installation using external suspension elements.
- Universal connection: horizontal or vertical with round or rectangular branch.
