

GREASE FILTERS

Type: Grease filters

Application: prefiltration in high-efficiency filters, filtration of dry dust and oil mist, treatment of airborne fumes and greases.

Frame: galvanized or stainless steel with aluminum steel mesh

Efficiency class: G2

Initial pressure drop: 5-45 Pa

Maximum pressure drop: 300 Pa

Recommended final pressure drop: 150Pa

Maximum operating temperature: 200°C

Relative humidity: 100%

Width (B), mm	Height (H), mm	Depth (D), mm	Filtering area m ²
250	500	10, 23, 48	0,12
287	592	10, 23, 48	0,17
400	400	10, 23, 48	0,16
400	500	10, 23, 48	0,20
400	625	10, 23, 48	0,25
500	500	10, 23, 48	0,25
500	625	10, 23, 48	0,31
592	592	10, 23, 48	0,35

Different grease filter dimensions are available according to ventilation system requirements.
