

Vaclnox | Brazed Plate Heat Exchangers

FOR DEMANDING MEDIA AT ELEVATED PRESSURE

DESIGN & FUNCTION

Vaclnox, the solution for highest requirements for potable water applications and industrial processes.

Vaclnox is our new, unique and revolutionary technology for a solid/resistant connection of stainless steel plates. It enables a compact design and a maximal corrosion resistance.

To meet the increased demands in terms of high temperatures and pressures up to 35 bar/508 psi a special brazing filler free of non-ferrous metals is used.

The GVH-Series unifies the compact design and economy of a brazed plate heat exchanger with the utility of a shell-and-tube heat exchanger. Vaclnox is the solution for applications with aggressive media and high pressures.

ADVANTAGES

- ▶ FREE OF NON-FERROUS METALS
- ▶ HIGH CORROSION RESISTANCE
- ▶ HIGH PRESSURE RESISTANCE
